

SCHOOL MANAGEMENT, CONNECTED

The smarter way to run your *school.*

Professional school websites. Connected administration.
Better school management — set up, supported and
maintained for you.

Most schools don't have a technology problem. They have a **connection** problem.

Admissions sit in one register, results in a spreadsheet, fees in a receipt book and parent messages across a dozen phones. Each works on its own. Together, they cost time, invite errors and make it hard to see the whole school at once.

WHAT MANY SCHOOLS LIVE WITH

WHAT A CONNECTED SCHOOL LOOKS LIKE

1 Records in too many places

Student details copied between files, registers and spreadsheets — and rarely in agreement.

One record for every student

Admission details, class, attendance and results kept together, updated once and available to the people who need them.

2 Result season takes weeks

Scores collected on paper, totalled by hand and typed up again for every report card.

Report cards from the data you already have

Teachers enter scores as assessments happen. Results are processed and report cards printed from the same records.

3 Fee balances need a phone call

Confirming who has paid means checking receipt books, bank alerts and memory.

Every naira recorded against a student

Invoices and payments tracked in one place, with online fee payment and full financial reporting available on Premium.

GROWTH & PREMIUM

4 Parents hear news late

Families wait for open day, or a printed note, to learn what is happening with their child.

Families who follow along all term

Portals and SMS alerts keep families informed about notices, attendance, homework, results and invoices.

GROWTH & PREMIUM

5 Departments that don't talk

Academics, bursary, staff matters and school services each run their own system — or none.

The whole school in one view

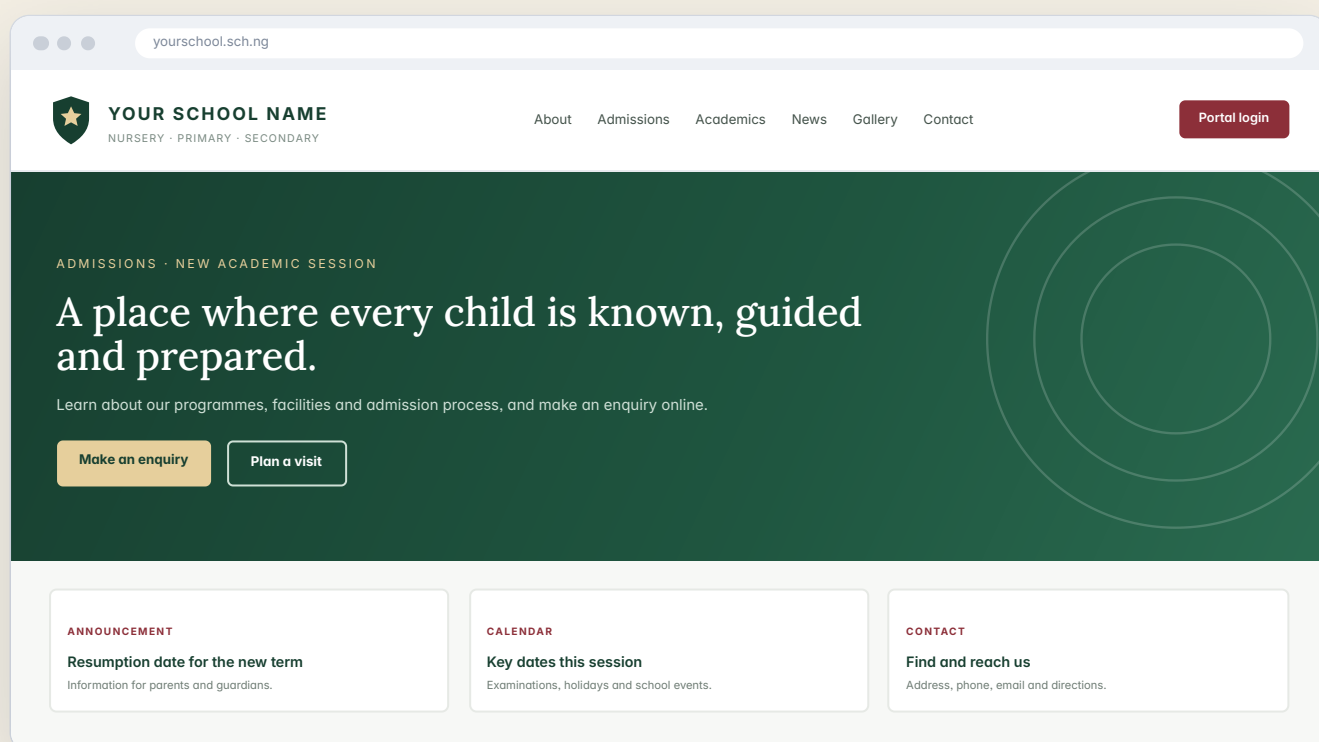

Academics, finance, staff, library, transport and hostel connected under a single managed service.

PREMIUM

A website that looks like the school you've *built*.

INCLUDED WITH EVERY PACKAGE

For many parents, your website is the first visit they make to your school. We build and manage a professional website in your school's own name and colours — a credible front door that works well on every phone, tablet and computer.

ILLUSTRATIVE EXAMPLE · EACH SCHOOL'S WEBSITE CARRIES ITS OWN NAME, COLOURS AND CONTENT

i. Your identity, presented properly
Your crest, colours, history, mission and leadership — consistent wherever parents find you.

iii. News and announcements
Resumption dates, events and school notices published in minutes — not reprinted on paper.

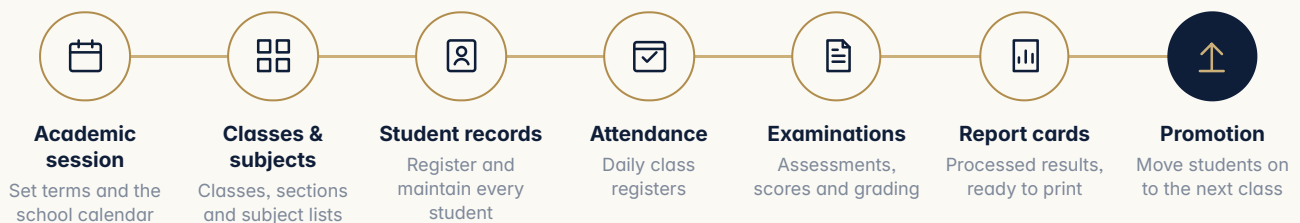

ii. Admissions information that works
Programmes, requirements and how to apply, with online admission enquiries from the Growth package.

iv. Its own address, its own brand
Every client school is independent, with its own website and domain identity. On Premium, the domain name and its yearly renewal are included.

Academics under control, from first register to final *report card*.

INCLUDED WITH EVERY PACKAGE

The academic year follows the same rhythm in every school. Our platform follows it too — so each step builds on the one before, and nothing has to be typed twice.

For teachers

- Take class attendance on the system instead of rebuilding paper registers each term.
- Enter assessment and examination scores directly against each student.
- See only their assigned classes, subjects and student lists.

For administrators and school leaders

- Set up sessions, classes, sections and subjects once — then reuse them.
- Import existing student and staff records from spreadsheets instead of retyping them.
- Keep teacher and staff records alongside the classes they teach.
- Print exam admit cards, timetables and a whole class's report cards in one go.
- Promote students at the end of the session without re-entering their records.
- Publish notices to the school community from the same system.

YOUR SCHOOL NAME TERMLY REPORT · FIRST TERM				
Student: Sample Student		Class: JSS 2		
Session: Current session		Attendance: 58 / 60 days

Civic Education	26	38	64	B
Computer Studies	33	49	82	A
Class teacher's remark		Principal's remark		

ILLUSTRATIVE REPORT CARD · SAMPLE DATA ONLY

School-specific document branding and customisation options are available on request.

Keep families close to learning — every day, not just on *open day*.

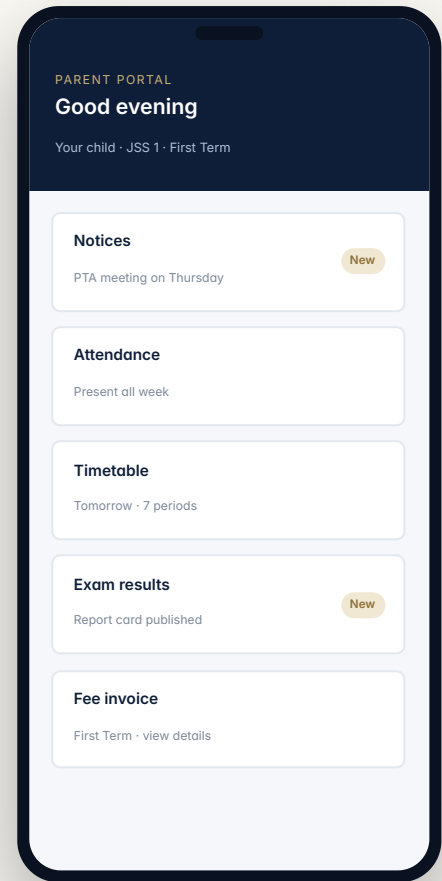

From the Growth package, parents and students each get their own secure portal, and the school can send SMS and WhatsApp alerts. Information reaches families directly, and teachers spend less time answering the same questions one by one.

AVAILABLE FROM GROWTH

7:40 pm A WEEKDAY EVENING

A parent opens the portal on her phone. She reads **the latest notice** about Thursday's PTA meeting, checks **tomorrow's timetable** and **her son's attendance**, and views **the term's fee invoice**. In the next room, her son opens **this week's homework** and the **study notes** his teacher uploaded that afternoon.

An illustrative scenario showing Growth-package portal features.

ILLUSTRATIVE INTERFACE

What parents can do

- ✓ Receive SMS and WhatsApp alerts from the school*
- ✓ Read notices and follow the school events calendar
- ✓ Follow attendance, timetables and exam results
- ✓ View fee invoices and payment history
- ✓ Request leave and raise support tickets

What students can do

- ✓ See timetables, homework and study materials
- ✓ Submit homework online
- ✓ Check exam timetables and results
- ✓ Message the school through built-in messaging
- ✓ Keep up with notices and announcements

* Message credits from the SMS or WhatsApp provider are paid separately.

From fee records to full financial *control*.

Fees keep a private school running, so fee information should never depend on a single receipt book. Growth organises fee administration. Premium turns it into complete financial management.

GROWTH

FEE ADMINISTRATION

Know who has been billed and who has paid.

Clear fee records for every student, kept by the bursary team.

- ✓ Fee invoices raised for each student
- ✓ Payments received by cash or transfer recorded manually
- ✓ Outstanding fees visible against each invoice
- ✓ Fee concessions for siblings, scholarships or staff children
- ✓ Bulk printing of invoices
- ✓ Invoices visible to parents through their portal

PREMIUM

FINANCIAL MANAGEMENT

See the whole financial picture of your school.

Everything in Growth, plus online collection and full income and expense management.

- ✓ Online school fee payments through Paystack
- ✓ School income and expense management
- ✓ A fee defaulters list for timely follow-up
- ✓ Donations tracking
- ✓ Financial reporting for school leadership

Fees overview · First Term

All classes

INVOICE	CLASS	METHOD	STATUS
INV-0418	Primary 3	Online	Paid
INV-0419	JSS 1	Bank transfer	Part-paid
INV-0420	SS 2	Online	Paid
INV-0421	Nursery 2	Cash	Paid
INV-0422	JSS 3	—	Issued

ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

Payments go to your school. Online fee payments are received through the school's own configured payment arrangement. Transaction charges are set by the payment provider.

Your fees and our subscription are separate. We bill our service subscription to the school directly; it is never mixed with the fees your parents pay you.

Essential focuses on academics. Fee invoicing begins with Growth, and online collection and financial reporting are part of Premium.

Everyone sees what they need. *No more, no less.*

Role-based access, in plain language

Every person signs in with their own account. What they can see and do depends on their role and the permissions your school administrator sets.

A teacher manages their own classes. The bursary handles fees. A parent sees information for their own children only. Sensitive information stays with the people responsible for it.

Role availability and functions depend on the selected subscription package and configured access permissions.

Admin
Coordinates school operations, academic management, staff, records and day-to-day administration.

Teacher
Manages assigned classes, student attendance, assessments, learning activities and academic information.

Accountant
Manages student fee records, invoices, payments, expenses and other financial activities, as enabled by the package.

GROWTH +

Receptionist
Handles admissions, enquiries and the relevant front-office responsibilities.

Student
Accesses learning materials, academic activities, examinations and school information, as enabled.

GROWTH +

Parents
Follow their children's academic progress and use the supported fee, academic and communication features.

GROWTH +

Librarian
Manages library books, library cards, lending records and returns.

PREMIUM

A school is more than its classrooms. *Run all of it.*

Staff to pay, buses to schedule, boarders to house, books to lend, supplies to issue. As a school grows, these operations need the same order you bring to academics — and Premium connects them all.

PEOPLE	CAMPUS	LEARNING	ADMINISTRATION
Your workforce  Staff attendance Daily staff attendance records  Leave management Requests and approvals in one place  Payroll Staff pay connected to staff records  Staff ID cards Printable identity cards for staff	School services  Library Books, cards, lending and returns  Transport School routes and transport records  Hostel Boarding facilities and allocation	Teaching tools  Lessons & chapters Structured lessons, chapters and activities  Recorded lessons Lessons students can revisit  Live classes Through Zoom or Google Meet*	Oversight & control  Reports & analytics Schoolwide reports, fee defaulters and academic analytics  Activity log A record of who changed what  Stock & stationery Supplies issued and accounted for  Gate passes Controlled, recorded exits

WHO BENEFITS MOST

Boarding schools

Hostel, gate passes and stock management bring order to life outside class hours.

Schools with buses

Transport records sit alongside the students who use them.

Larger staff teams

Attendance, leave and payroll managed with the same discipline as academics.

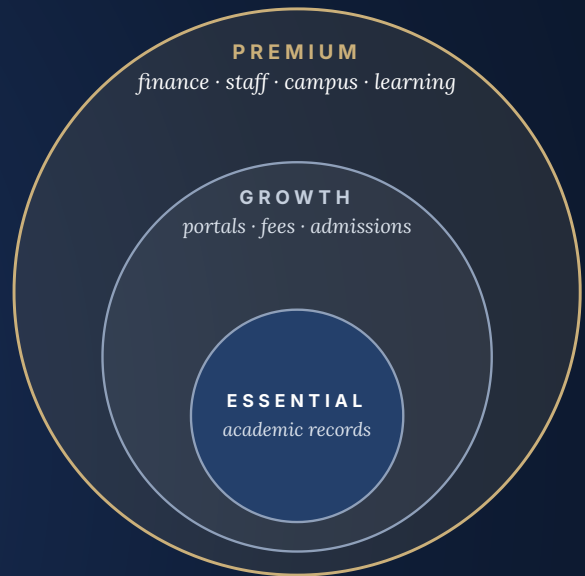

Multi-branch schools

Manage multiple branches of the same school organisation from a connected system, where supported.

* Live classes use the school's own Zoom or Google Meet account, which may require a paid subscription. Module availability depends on your school's needs and configuration.

Why settle for *part* of the system?

Essential digitises your academics. Growth connects your school to families. Premium connects **everything** — academics, finance, staff, families and school operations — in one managed service.

1 Every standard module, one subscription
Complete access to the standard features of our school management platform — nothing held back.

2 See the whole school at a glance
Management reports, fee defaulter lists, academic analytics and an activity log of who changed what.

3 Collect fees online
Parents pay school fees through Paystack into the school's configured account, alongside full income and expense records.

4 Run your staff operations
Staff attendance, leave and payroll managed inside the same system as your academics.

5 Serve the whole campus
Library, transport, hostel, stock and gate passes for schools whose work extends beyond the classroom.

6 Ready as you grow
Lessons and live classes for learning beyond the classroom, and multiple branches of the same school organisation where supported.

₦1,500

MORE PER STUDENT, PER TERM

That is the difference between Growth and Premium. For it, your school adds **online fee collection, financial reporting, staff management, campus services and learning tools** — plus your school's domain name, renewed every year while you subscribe.

Three packages. Each one builds on the *last*.

Every package includes your professional school website, hosting management and ongoing maintenance. Prices are per active student, per academic term.

WHAT'S INCLUDED	ESSENTIAL	GROWTH	RECOMMENDED
	₦1,500 per student / term Digital academic administration	₦2,500 per student / term Connects school, parents and students	PREMIUM ₦4,000 per student / term The complete school management package

Domain name and yearly renewal included	—	—	✓
Growth includes everything in Essential. Premium includes everything in Growth.			ALL STANDARD FEATURES

External services such as payment-processing charges, paid messaging credits, conferencing subscriptions and specialist hardware may carry additional costs. Availability of some functions depends on your school's configuration.

Simple to start. Clear to *budget* for.

One setup fee to get your school live, then a termly subscription based on your package and the number of active students.

ONE-TIME SETUP & TRAINING

₦250,000

Paid once, at the start of your service.

Your setup fee covers

- ✓ Website setup
- ✓ System configuration
- ✓ Academic structure
- ✓ Staff training

Hosting management and maintenance are included in every package. On Premium, your domain name and its yearly renewal are included while you subscribe; on Essential and Growth, the domain is registered at the school's cost.

06

Launch

Your school goes live

07

Managed service

Maintenance and termly renewal

How your subscription is calculated

Package rate × active students = termly subscription

EXAMPLE · A SCHOOL WITH 100 ACTIVE STUDENTS

Essential · ₦1,500 × 100 **₦150,000 / term**

Growth · ₦2,500 × 100 **₦250,000 / term**

Premium · ₦4,000 × 100 **₦400,000 / term**

Illustrative calculation. Your subscription reflects your chosen package and your actual number of active students each term.

Termly renewal

Subscriptions renew with each academic term, not on a fixed calendar schedule. A 14-day grace period follows each expiry date. Your public website stays online and your school records are preserved; continued use of management functions follows your service agreement.

Quoted separately, when needed

School-specific document branding and customisation options are available on request. Custom development beyond standard setup, third-party charges (payment processing, SMS and WhatsApp credits, Zoom or Google Meet) and hardware — including optional biometric staff attendance terminals, subject to compatibility and technical verification — are quoted separately.

Your school deserves a better way to *operate*.

See the platform working with a school like yours. We'll walk you through the website, the portals and the management tools — and recommend the package that fits your school.

i.

Request a demonstration

A guided walk-through of the full platform, at your school or online.

ii.

Discuss your requirements

Tell us how your school runs today and where you want it to be.

iii.
